

PARTICLE SIZES SECURITY PRINT

Disposal solutions for bank notes, security documents and digital data drives

The Hunkeler Systeme destruction machines are working according to DIN-66399 regulation. The higher the security level from 1 to 7, the smaller the particles of the destroyed material.

Banknotes

Print waste

Secure documents

Data destruction

Paper

Electronic waste

Foils

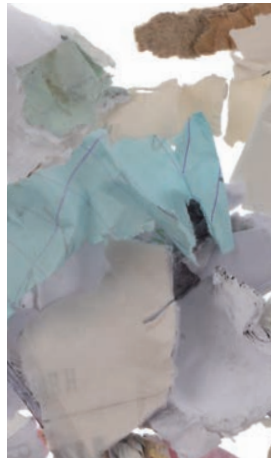

Labels

Holograms

One – stage Shredding

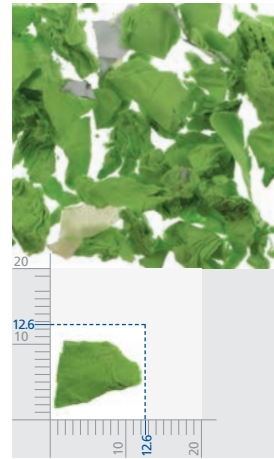

P-1 Particle size max. 2'000 mm²

P-2 Particle size max. 800 mm²

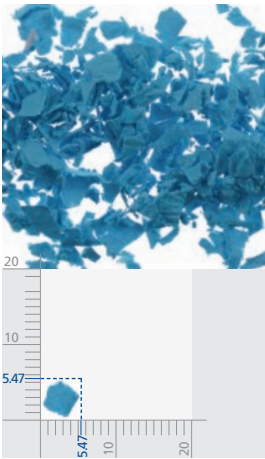

P-3 Particle size max. 320 mm²

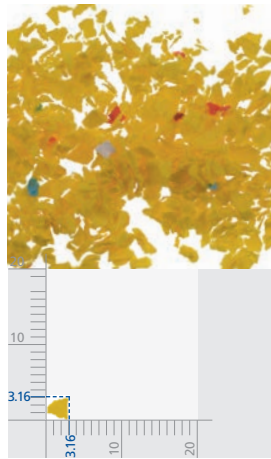

P-4 Particle size max. 160 mm²

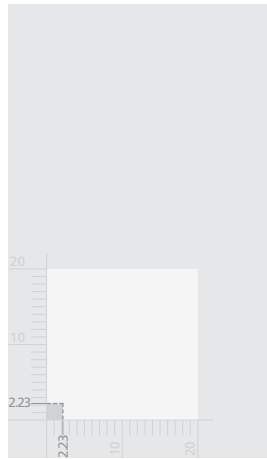

Two – stage Shredding with Granulator

P-5 Particle size max. 30 mm²

P-6 Particle size max. 10 mm²

P-7 Particle size max. 5 mm²

E-1

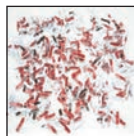

inoperable

E-2

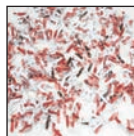

split

E-3

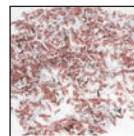

Particle size max. 160 mm²

E-4

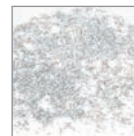

Particle size max. 300 mm²

E-5

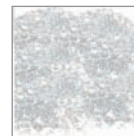

Particle size max. 10 mm²

E-6

Particle size max. 1 mm²

E-7

Particle size max. 0,5 mm²

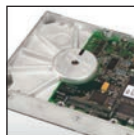

Electronic data destruction

H-1

inoperable

H-2

damaged

H-3

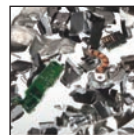

deformed

H-4

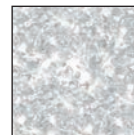

Particle size max. 2'000 mm²

H-5

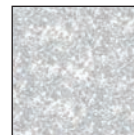

Particle size max. 320 mm²

H-6

Particle size max. 10 mm²

H-7

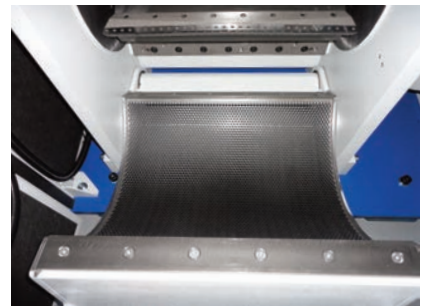

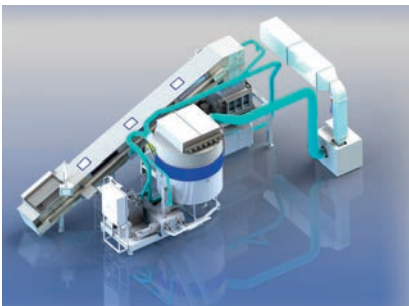

Particle size max. 5 mm²

Shredder

This machine is especially suitable for continuous operation around the clock thanks to its robust construction as well as the strong and hard-wearing knives. The application of these machines is extremely versatile and ranges from paper, carton, cardboard, synthetics up to metals.

Shredder

This machine is especially suitable for continuous operation around the clock thanks to its robust construction as well as the strong and hard-wearing knives. The application of these machines is extremely versatile and ranges from paper, carton, cardboard, synthetics up to metals.

Granulator

The high-performance granulator is used in the post-shredding/granulation sector for paper, banknotes and carrier foils in the high-security data protection field. Technological features such as the rotating of the cutting inserts or the device's longevity are strong indicators of the high quality of this granulator.

Electronic Data Destruction

Shredders are the safest solution when it comes to the destruction of confidential and personal data. They can turn computers, hard disks, mobile phones, credit cards, CDs, DVDs, diskettes and USB sticks into strips or small particles.
